Primary Examiner  
Art Unit: 1724

The following is an examiner's statement of reasons for allowance:

Claims 10-19 and 21-23 are allowed because the references of record do not teach or fairly suggest a recirculating filter system having a tank with troughs forming channels integrally in at least the bottom and side walls of the tank, and at least one mattress-like filter having aggregate material sealed therein within the tank.

Also, as correctly pointed out by Applicant in the response filed March 1, 2004, since the examiner has already determined that the term "recirculating filter system" of the preamble in claims 10-19 and 21-23 limits the structure of the claimed invention, and is therefore a claim limitation, there is no need for Applicant to recite additional recirculating filter structure in the body of these claims.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to I. Cintins whose telephone number is (571) 272-1155.
